

Navigate risk. Drive growth.

We deliver better business outcomes through innovative technology, data, and insights.

Who we are

G2 Risk Solutions (G2RS) is a global provider of risk and regulatory solutions for regulators, large banks, NBFCs, and insurance companies. We offer tailored solutions based on recent regulatory changes in India to meet NBFC needs. Our data-driven approach helps NBFCs identify and mitigate risks, ensuring timely compliance with local regulations. Our consultative approach, guided by industry and technical experts, enables NBFCs to seamlessly adapt to current and future regulatory changes.

Why NBFCs prefer our data and regulatory solutions

- **Experience tailored for India:** Over 17 years of experience in regulatory reporting for BFSI, with a special focus on the Indian Banking and NBFC sector.
- **Innovative automated technology:** Expertise in creating unified and normalised data from complex siloed data then using it for AI/ML, insights, industry-specific reports, etc.
- **Simplicity amidst complexity:** Our product design ensures easy execution of intricate business logic, with prebuilt regulatory taxonomies, empowering NBFC professionals.

Our solutions

Regulatory Reporting

Pre-packaged CIMS reports specific for the NBFC sector.

NPA Management

Identify, manage, and report impaired assets and compute provisions in line with IRAC norms.

ECL Calculation

Measure, orchestrate, and manage your ECL computation using multiple ECL models.

CIC Reporting

Seamlessly submit data to all credit bureaus, ensuring accurate and timely reporting.

Early Warning System

Leverage internal and external data to assess and manage credit risk profiles with AI-driven nudges to enable right decision.

Data Curation

Measure and monitor data quality, perform data enrichment, and assign data ownership specific to NBFC Operations.

Key features for NBFCs

Unified data aggregation

Seamlessly integrate data from diverse systems specific to NBFC operations and utilize for multiple use cases.

Swift reporting

Generate regulatory reports in XBRL/XML/XLS/PDF formats instantly with automated submission.

Clear workflow and audit

Collaborate effectively with a clear view of all changes and their timelines.

Data lineage

Drilldown to the lowest granular data for traceability.

NBFC report templates

Pre-packaged reporting templates and business rules catering to specific NBFC guidelines.

On-cloud deployment

Scale your resources up or down based on requirements and reduce capital expenditure associated with maintaining physical servers.

Intuitive validations

Execute complex validations effortlessly from the front-end.

NBFC customizability

Configure the product to align with your specific regulatory requirements.
